Financing Recovery and Achieving Debt Sustainability in a Post-Pandemic Period

The Role of Debt Managers in Achieving Debt Sustainability

Thursday 2 September 2021, 1300 – 1500hrs (BST)

Although the primary responsibility for ensuring prudent debt levels and debt sustainability analyses lies with fiscal policymakers, debt managers and authorities have a unique role in implementing prudent debt management policies that are coordinated with sound macroeconomic policies. In addition, debt managers are assigned the important tasks of managing the existing debt portfolio while at the same time, crafting debt strategies to fund long-term post-pandemic recovery initiatives.

In this session our distinguished panel will explore the essential role of debt managers in achieving debt sustainability and how this may be done in practice.

Speakers

Tshepiso Moahloli
Deputy Director-General, ALM, South Africa National Treasury

Dr M Z M Aazim
Superintendent & Registrar, Public DeM, Central Bank of Sri Lanka

Andre Foster
